

**Architecture Program
Bachelor of Architecture**

Educational Objectives

General Objective

To educate architects with a strong knowledge foundation, critical thinking skills, and creative design capabilities, enabling them to conduct research and solve architectural problems effectively; demonstrate proficiency in communication skills and the use of modern design tools; practice with professional ethics, social responsibility, and global adaptability; and contribute to sustainable, aesthetic, and human-centered architectural development.

Specific Objectives

PEO1 – Equip learners with solid professional knowledge and comprehensive professional competencies in architecture, enabling them to effectively meet the demands of multidisciplinary, multicultural, and internationally integrated environments.

PEO2 – Develop learners' lifelong learning capabilities, research-oriented thinking, and the ability to apply advanced technologies in design and solving practical architectural problems.

PEO3 – Foster critical thinking, broad perspectives, collaborative spirit, and professional ethics, enabling learners to contribute to addressing architectural issues associated with communities, the nation, and global challenges, with a focus on sustainable, aesthetic, and human-centered development.
