

Program learning outcomes

PLO1: Apply professional knowledge and skills to solve practical problems in the field of architecture.

PLO2: Make architectural judgments grounded in ethics and professional responsibility, with due regard for environmental, public-safety and public-health issues as well as the cultural and social context.

PLO3: Think creatively to propose architectural options and solutions for a wide range of building types.

PLO4: Analyze, evaluate, and critique architecture in order to make scientifically grounded decisions on architectural options.

PLO5: Apply digital tools to enhance work efficiency and support architectural creativity.

PLO6: Communicate architectural ideas and design proposals to peers in the profession and to others.

PLO7: Exercise autonomy and take responsibility for developing personal and professional competence in the field of architecture.
