

Objectives of the training program

1. General objective

The programme aims to educate architects with a solid foundation of knowledge, critical thinking, creative design competence, and the ability to conduct research and solve architectural problems. Graduates will possess effective communication skills, proficiency in contemporary design tools and technologies, and the professional ethics, social responsibility, and global competence required to contribute to sustainable, aesthetic, and human-centred architecture.

2. Specific objectives

PEO1. Professional Competence

Graduates are expected to possess strong disciplinary knowledge and comprehensive professional competence in architecture, enabling them to practise effectively in multidisciplinary, multicultural, and internationally integrated environments.

PEO2. Lifelong Learning, Research and Innovation

Graduates are expected to demonstrate lifelong learning, a research mindset, and the ability to apply advanced technologies in architectural design and solving practical architectural problems.

PEO3. Critical thinking, Ethics and Sustainable Development

Graduates are expected to demonstrate critical thinking, broad perspectives, collaboration, and professional ethics in contributing to the solution of architectural challenges for communities, the nation, and the global society, towards sustainable, aesthetic, and human-centred development.
